SCUBA REPLACEMENT PACKAGE MOBILE/PORTABLE SPREAD

PORTABLE SCUBA REPLACEMENT PACKAGE

IMCA compliant mobile/portable SRP spread. Assembled in accordance with Design Documents D040 and maintained according to IMCA D018 for the Initial and Periodic Examination, testing and Certification of Diving Plant and Equipment.

A mobile/portable surface supplied system, commonly referred to as SCUBA replacement equipment, can in certain circumstances, be used in place of a complete surface supplied diving system. Such systems have advantage of being readily portable, thus offering greater flexibility during the diving operation, but are limited in the supply of breathing air available.
